Backend: Java, JSP, Servlets, JDBC, REST, Spring Boot

Database: MySQL

Tools & IDEs: Eclipse, Visual Studio Code, Notepad++, MS Word, MS Excel, MS PowerPoint

PROJECTS

Name : FinanceBuddy - Personal Finance Management System | [🔗 Link](#)

Environment : Java, Spring Boot, JSP, HTML, CSS, JavaScript, Maven

Description : A web-based personal finance management system developed for tracking income, expenses, and financial insights with role-based access control. The application includes three modules - Admin Panel for managing users and all transactions, Analyst Panel for viewing reports, and User Panel for personal transaction management. The system uses in-memory data storage for simplified implementation and JavaScript for interactive data visualization.

Key Features :

- Built three user roles (Admin, Analyst, User) with different permission levels for secure access.
- Implemented full CRUD operations for financial transactions with category, type, and date-based filtering.
- Added interactive dashboard with bar charts, pie charts, and line charts using JavaScript.
- Developed reports for spending analysis and financial trends.
- Included print functionality to export reports as PDF.

Name : Hostel Management System | [🔗 Link](#)

Environment : Java, JSP, Servlets, AJAX, JDBC, MySQL, HTML, CSS, JavaScript

Description : A web-based hostel management application developed to manage student information, caution money, advance payments, hostel fee records, and related administrative operations. The system uses MySQL as the backend database for secure storage and retrieval of student and payment data.

- Developed the Student Module for managing student records, caution money, advance payments, and fee details.
- Implemented CRUD operations with AJAX-based real-time updates.
- Integrated MySQL database using JDBC for storing and retrieving student and financial records.
